

COUNTRY DASHBOARD

Sri Lanka

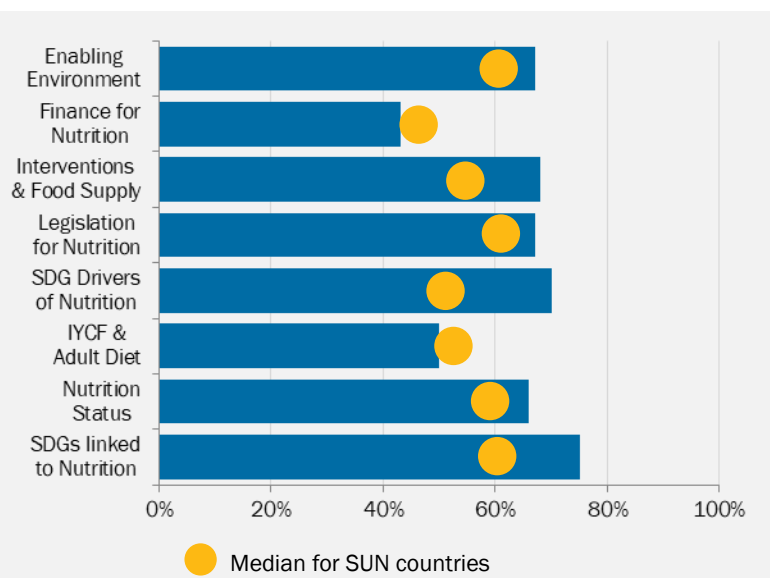

SRI LANKA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Sri Lanka are available for 67/79 (85%) indicators mostly covering the timeframe 2007-2016. Based on the data, Sri Lanka is progressing relatively well with strong performance in the functioning of the multi-stakeholder platform and underlying drivers for nutrition and nutrition-related SDG's and some success in health interventions, legislation (BMS code, maternity protection and right to food) and uptake of exclusive breastfeeding. However, more could be done for the enabling environment (UN and Business network functionality), legislation (food fortification) and the scaling up of high-impact maternal and child nutrition interventions to address the high incidence of low birth weight and under-5 wasting. Missing data on finance, early childhood development and complementary feeding practices is also noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
